

WHAT YOU NEED TO KNOW BEFORE HAVING ANTI-WRINKLE INJECTIONS...

Do not have these treatments:

- If you are allergic to botulinum neurotoxin or any of the listed ingredients of Allergan® 'Botox' or Bocouture®.
- If you suffer from a generalised disorder of muscle activity.
- If you have an infection or inflammation at the proposed injection site.

Possible side effects:

These will be discussed fully with your clinician, but can include:

- swelling
- bruising
- redness at the injection site
- itching and tingling around the injection site
- droopy eyelid or crooked smile (depending on which site has been treated)
- headache

* **Complimentary consultations are required before first treatments with us.**

ANTI-WRINKLE SOLUTIONS

including
Allergan® 'Botox' & Bocouture®

oldstablesdental.co.uk

YOUR QUESTIONS ANSWERED...

How can anti-wrinkle injections help to treat my facial lines?

This is a treatment that relaxes the muscles around the upper facial lines and softens their appearance.

How is my treatment carried out?

The anti-wrinkle solution is injected to multiple sites around the facial lines using a very fine needle.

What should I be aware of after my treatment?

You should not massage the area that has been treated. Take care when applying cosmetics around the injection sites to minimise the risk of infection.

When will I see results?

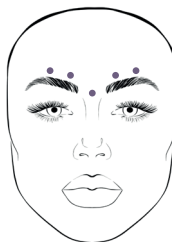

You may start to see an effect from your treatment as soon as 2–3 days after your injection, although people can respond differently to treatment and this can take longer in some people.

How long will it last?

The effects of the anti-wrinkle injection can last for 3–4 months. The treatment effect gradually wears off, so repeat treatments may be needed to maintain the effect.

UPPER FACIAL LINES TREATMENT OPTIONS:

Glabellar Frown Lines

Horizontal Forehead Lines

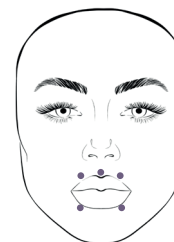

Crow's Feet Lines

LOWER FACIAL TREATMENT OPTIONS:

Gummy Smile Reduction

Lip Flip

Jaw Muscle Relaxation
(to prevent clenching)

OTHER TREATMENT OPTIONS:

Frown and crow's feet	£280
Frown, forehead and crow's feet	£325
Lip flip	£195
Gummy smile	£195
Masseter jaw muscle	£350

What are anti-wrinkle solutions and what are they used for?

Our anti-wrinkle solutions which include **Allergan® 'Botox'** and **Bocouture®** are medicines which contain the active substance Botulinum toxin type A which relaxes the injected muscles.

It is used for temporary improvement of moderate to severe facial lines, such as:

- Vertical lines between the eyebrows (glabellar frown lines)
- Horizontal forehead lines
- Crow's feet lines (lateral periorbital lines)

It is also used for cosmetic improvement of thin lips by making them look a little fuller. We can improve gummy smiles by lowering the lip line slightly.

It can also be used to help relax the strong facial muscles that cause clenching. This can reduce headaches and damage to teeth.
